EDUCATION

| | | | |
|-----------------|--------------------|---------------------------------------|---------|
| 2014.09-2018.07 | Soochow University | B.E., Computer Science and Technology | GPA:3.2 |
|-----------------|--------------------|---------------------------------------|---------|

PROFESSIONAL SKILLS

-
- * Familiar with C++, Java, and Python
 - * Familiar with Linux/Unix distributed systems and shell commands
 - * Familiar with TCP / IP protocol

WORK EXPERIENCE

2018.2-2018.4

Ketianyun Co., Ltd. Software R&D Intern

- * Optimize, compile, and deploy call center logs with C++
- * Write the chatting robot's RESTful API with Java
- * Make a Softphone iOS app demo based on SIP protocol
- * Optimize the front page of call center with Vue.js

PROJECT

2018.1-2018.5 Knowledge Graph Platform Based on User Complaint Text

We use BeautifulSoup to extract complaint texts on HTML pages and use jieba to segment the text. Then we remove the Stop words to clean data, and select the high frequency vocabulary. After that, we conduct the vocabulary analysis, identify entities and relationships. We store them using MySQL. Finally, we use Vue.js to write the front pages that are used to show the result.
